

ALWAYS READY.
ALWAYS RUGGED.

Built for today's mobile workforce, **the Getac T800 fully rugged tablet** features an 8.1" HD LumiBond® display for better viewing experience, the latest wireless technology, and a thin, ergonomic design which allows it to be held comfortably in one hand. The T800 provides best-in-class battery life to get you through your shift and it's no-compromise rugged features guarantee that it will always be ready.

Designed to fit ergonomically in one hand, the new T800 tablet weighs less than 907g and is less than 2.54 cm thick, with a concave, non-slip case that makes it easy to grip.

Brilliant 8.1" Display

Size matters when it comes to screen size. That's why we built the compact T800 rugged tablet with an 8.1-inch HD LumiBond® display, a 34 percent larger screen area than a typical 7-inch tablet. Compare them yourself, and you'll understand why size matters.

LumiBond® 2.0: Better, Brighter, Stronger

The T800 uses our revolutionary LumiBond® 2.0 technology to achieve a display that is more readable and offers better contrast and more crisp colors than any other rugged tablet display. By bonding the display glass with the touch panel and LCD, we've created a single panel that is more durable, minimises glare and improves readability. Four advanced touch modes (Touch/Rain, Glove or Pen mode, plus an optional Digitizer mode) and the included hard-tip stylus enable you to capture signatures and take more precise notes on drawings, maps, or forms.

Powerful, Yet Efficient

Inside the T800, we packed an incredible amount of power and technology. Built with the latest Quad-core Intel® Atom™ x7-Z8700 1.6 GHz processor, the T800 provides all of the performance you need to get things done, with no compromise to battery life.

Android OS.

Apps have changed the way we access and enter data remotely. Android OS makes it easy to build a custom app or use one of the many apps that can help you get your job done quickly.

SnapBack Add-ons

We designed the T800 for expandability with our unique SnapBack add-ons. Integrated as an extension to the T800, you can add on an extended battery, SmartCard + RFID or SmartCard + magnetic stripe reader.

And they easily snap right on or off — no tools necessary.

Lasting Power

The T800 fully rugged tablet delivers up to 10 hours of battery life on a single charge. Additionally, you can have endless Snap Back battery add-ons (each providing an additional 10 hours) at the ready for potentially infinite, uninterrupted battery life. This allows you to keep working without ever shutting down your apps or the Windows OS.

4G LTE, WiFi & GPS

We packed the new T800 rugged tablet with the latest technologies to keep you connected. Designed to be used in the field, your T800 can be configured with 4G LTE cellular data with an auto tunable 8-band antenna capable of quickly switching between bands¹. Every T800 includes the latest 802.11ac WiFi for data transfer speeds up to 3X faster than 802.11n products. The T800's dedicated GPS offers 2x search capacity, faster location positioning and improved accuracy over competitors' embedded GPS designs.

Vehicle Ready

For vehicle deployments, the T800 can be configured with tri-pass-through antenna ports allowing you to simultaneously connect high-gain GPS, WWAN and WLAN roof mounted antennas.

Security Redefined

Experience an industry-leading suite of security features, including multi-factor authentication, to protect against malicious threats and intrusions.

NFC/RFIC Reader

Authenticate your credentials via Near Field or Radio Frequency transmission.

Smart Card Reader

The T800 supports Smart Cards for secure identity verification.

Absolute DDS

This optional protective measure disables your T800 if it detects an unauthorized or compromised entry.

Trusted Platform Module

The T800 features TPM 2.0 – a powerful anti-tampering device that checks for any signs of intrusion during system boot-up.

Windows 10 Security

The T800's hardware fully supports Microsoft's latest authentication tools, including Microsoft Passport and Credential Guard.

Built-to-Survive

Only Getac manufactures rugged tablets down to the chassis. The T800 was engineered to protect the tablet against drops, shocks, spills, vibration, dust, liquid and more. The T800 has been independently tested and certified to

MIL-STD 810G and IP65 standards.

ATEX Certified

We offer the option for ATEX Zone 2/22 certification for use in potentially explosive atmospheres. Insulating mechanical material and exceptional circuit designs are applied to ensure the T800 is ignition-proof and intrinsically safe.

Less Downtime When It's Crunch Time.

It doesn't happen often, but if a T800 ever needs to be serviced, Getac offers unmatched coverage that will ensure you get your computer fixed and back on the job fast.

Nothing says quality like a manufacturer standing behind their product. We've designed the T800 rugged tablet from the inside out to survive drops, shocks, spills, vibration and more. We're confident in our quality and that's why the rugged T800 comes standard with 3 years Pack & Collect warranty. It's the peace-of-mind protection of knowing you're covered.¹

Standard.

3 years Pack & Collect; Getac Recommend 3 years Protection Plus

¹ LTE model must be configured at time of manufacturer. Mobile data requires subscription fees sold separately.

² T800 comes standard with a 3-year Pack & Collect warranty. For full details of the warranty protection, see the terms and conditions.
